Taco Announces New 180 Watt ECM High-Efficiency Circulators

Taco Comfort Solutions® has expanded their family of easy-to-use, high-efficiency ECM circulators with the addition of the 180-watt 0034e™ and 0034ePlus™ 180 models. With quiet ECM motors, the new circulators offer up to 85 percent energy savings over a conventional circulator.

These circulators are ideal for closed-loop heating systems as well as hot water recirculation systems. Both circulators also offer a convenient, rotatable control box cover for a professional look, no matter the orientation of the installed circulator.

The 0034e features an easy-to-use dial with five operating modes, including constant pressure, fixed speed, Taco's exclusive activeADAPT™ self-adjusting proportional pressure, and 0-10V capability. The 0034ePlus adds more constant and proportional pressure settings as well as a digital display with real-time feedback, including watts, GPM, feet of head, and RPM. Both circulators are dual-voltage 115V/230V and are available with cast iron or NSF/ANSI 61 & 372 certified stainless steel volutes.

Both new circulators come with exclusive features that make Taco's ECM high-efficiency circulators so easy to use, including **SureStart**® automatic unblocking and air purging, **BIO Barrier**® black iron oxide protection, dual electrical knockouts, six-inch stranded wire, recessed flange nut-grabbers and double insulated so that no ground wire is needed.

The 0034e™ and 0034ePlus™ will be available in the 2nd quarter of 2020.
