Taco Announces New Micro Expansion Tank

Taco Comfort Solutions® introduces a new micro expansion tank for potable water, heating, and chilled water applications. With tank volumes from 2.6 to 6.5 gallons, the micro expansion tank features a replaceable, full acceptance heavy-duty Butyl bladder, eliminating the need for special internal linings.

Taco's micro expansion tank is NSF/ANSI 61-G certified and constructed per ASME section VIII Div. 1. Standard working pressure is 150 PSI with optional working pressures of 175 PSI or higher. Taco's micro expansion tank will be available in the second quarter of 2020.
