Do Not Track

Do Not Track (“DNT”) is a concept promoted by certain regulatory authorities and industry groups for development and implementation of a mechanism that would allow internet users to control the tracking of their online activities across websites. Currently, various browsers (including Internet Explorer, Firefox, and Safari) offer a DNT option that allows a user to set a preference in the browser to not have his/her activities on the internet tracked. You can usually access your browser's DNT option in your browser's preferences. When a user's browser is set to DNT, some cookies and other tracking technologies may become inactive, depending on how the website visited responds to DNT browser settings. If that occurs, the website visited will not recognize you upon return to that website, save your passwords or user names, and some other features of a website may become unavailable or not function properly.

Please read the privacy policies of these third party websites carefully before browsing or providing any information on such websites. We are not responsible for your activities or any collection or tracking of your information on such sites.
