

Better Booster System Solutions

Built right.

Introducing Taco's new and improved fully integrated domestic water booster systems from the industry leader in high quality fluid based systems. Taco's Booster Systems are factory assembled, performance tested, UL labeled, and backed with our solid reputation for product integrity.

A name you can trust.

Taco has over 35 years of experience in designing and building booster systems, with thousands of installations throughout North America. When you choose Taco, you can choose with confidence.

The best connections start here.

Compact and self-contained, our units are engineered for easy piping and wiring connections. But there's another kind of connection that matters: your connection with Taco. When you choose Taco, you'll experience the kind of support and dedication that makes working with us a pleasure. Taco is a people company that's devoted to the success of every project you do.

The system configuration utilizes our Vertical Inline Multistage Pumps making a compact, highly efficient design.

- Single source responsibility
- Factory assembled, tested, and UL labeled
- Compact design minimizes floor space
- Systems with flows up to 340 gpm will fit through a 36" doorway
- Available piping in copper, brass and stainless steel
- Header connections supplied grooved or flanged
- Quality engineered components
- Custom designs available

Certified to
NSF/ANSI/CAN 61
& 372

UL 508A

Sophisticated yet simple controller add superior efficiency.

Taco variable frequency drives bring longer pump life, superior performance, and cutting edge efficiency to our Booster Systems. These smart drives are push-button easy to set up and are accessible through all of the most popular BAS communication protocols.

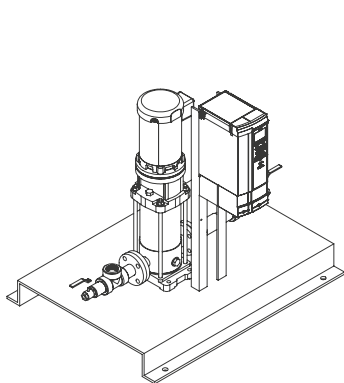

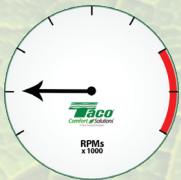

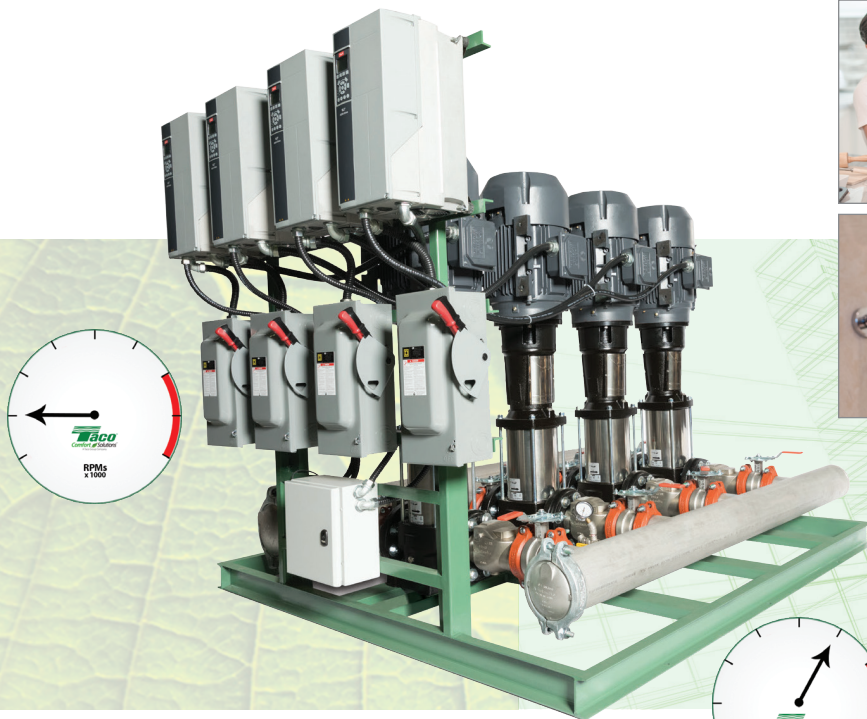

Your success is what counts.

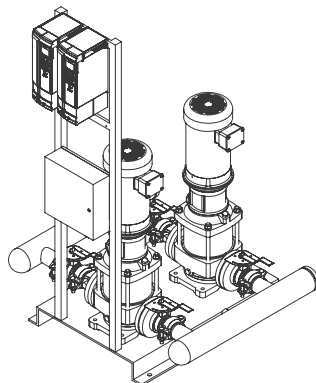

For over 100 years, Taco has been at the forefront of the HVAC industry. As a third generation family-owned American manufacturer, Taco keeps its fingers on the pulse of progress with innovations in ECM technology, controls,

web-based building management, and sustainability.
