## **Taco 4900 Series® Commercial Air Separator with Magnet Dirt Separator**

Taco Comfort Solutions® has expanded its 4900 Series® commercial air separator line to include a magnetic dirt separator. This single unit uses high-powered neodymium magnets combined with PALL ring high-efficiency micro-bubble air and dirt separation, which helps lower purchasing and installation costs. A patent pending on/off magnet and 2-3 inch full port blow down reduces field maintenance time.

The 4900 Series air separator with magnet offers a standard working pressure of 125 PSI with options for 150 PSI and higher. Options include stainless steel construction and high velocity models for higher flow rates, minimizing pressure loss. Taco's 4900 Series commercial air separator with magnetic dirt separator will be available in the 2<sup>nd</sup> Quarter of 2022.
