New Taco Compact Commercial HS Series Horizontal Split Case Pumps

Taco has introduced new, compact HS Series Horizontal Split Case Pumps, which take up 50% less floor space while offering the same superior hydraulic performance.

Precision engineered to decrease installation time and labor costs, the compact model does not require a steel base plate, and with its grouting- and alignment-free design, installation and maintenance are simpler, faster, and safer. Its stackable packaging size and 60% reduction in weight also lower total logistics costs — these early-stage savings improve project economics before the system is even commissioned.

The pump delivers industry-leading motor energy efficiency, reaching up to 97.1% to reduce lifecycle emissions. Its motor meets IE5 efficiency standards, improving operating margins and resulting in measurable, long-term ROI.

With four models to choose from ranging from 10 HP to 100 HP, specifiers can choose the optimal pump design for a wide range of system requirements. The pumps can be used for a variety of applications including data centers, high-tech cooling, air conditioning, and hydronic cooling.

Taco HS Series pumps are developed with sustainability in mind, lowering their CO₂ emissions in all facets along with operating costs. These pumps are ideal for commercial and industrial applications requiring higher performance with less complexity and a reduced footprint.

#

Founded in 1920, Taco is a global leader in hydronic and water-driven solutions, specializing in providing innovative, sustainable, and high-performance products for the HVAC, plumbing, and industrial sectors. With a legacy of over 100 years, Taco serves markets including residential, commercial, agriculture, mining, and more, offering a comprehensive range of products like pumps, valves, tanks, heat exchangers, and advanced controls. Taco is recognized for its unwavering commitment to customer success, providing expert guidance, training, and unmatched support. Headquartered in Cranston, RI, with operations across North America, Europe, and Asia, Taco delivers industry-leading products and solutions backed by a culture of collaboration, reliability, and integrity. Taco is proud to be the trusted partner for wholesalers, contractors, engineers, and OEMs seeking dependable, cost-effective solutions that make a positive impact on people and the planet.
